

Quanta & Qualia

Reinventing the Tracking

Our Vision

We aspire of a future that with the use of **our Technology**, mouse, keyboard and joysticks will be replaced, **unleashing so USER's CREATIVITY**

Virtual reality (**VR**) and augmented reality (**AR**) have the potential to become the **next big computing platform**, and as we saw with the **PC** and **smartphone**, we expect new markets to be created and existing markets to be disrupted

Agenda

1. The challenge
2. The Solution
3. Our Approach
4. Number #
5. Why us?

The challenge

We view the **user experience**, technology constraints, the development of content and applications, and price as key hurdles to adoption. **We believe the user experience will be the most important factor and expect technology advancements to reduce cyber sickness and increase mobility, expanding the use cases and pervasiveness of VR/AR.**

**Goldman
Sachs**

The Solution

FINGER TRACKING

LEAP
MOTION

MANUS • VR

SYSTEMS

GLOVE - TYPE

NON GLOVE TYPE

EXISTING TECHNOLOGIES

IMU | Flex | Touch | Magnetic

CAMERA | IR

DRAWBACKS

- **Re-Calibration**
- **Latency**
- **Use of Not Real Data**
- **Low UX**

- **Reflexion Issues**
- **Not Portable**
- **Restriction in Movement**
- **Use of Not Real Data**

PRODUCTS

Manus VR | Synertial Gloves | Smart Glove | HaptX

LEAP MOTION | SOLI | KINECT

Our Approach

*Bridging the **Visible** and the **Invisible***

MAGOS brings the Revolution

Real data

High
precision

Freedom of
movement

High
User Experience

MAGOS Solution

Hand / Finger track

Hand Orientation

Localization in 3D environment

Haptic & Force feedback

MAGOS | Technology in your hands ®

Q&Q | industry 4.0 NOW crowdhackathon

INPUT DEVICE in AR & VR

is a piece of computer hardware equipment used to provide data and control signals to an information processing system such as a computer or information appliance

TELEROBOTI

is the area of robotics concerned with the control of semi-autonomous robots from a distance, using Wireless network or tethered connections

MAGOS | Technology in your hands ®

Q&Q | industry 4.0 NOW crowdhackathon

Numbers

The Ecosystem

Virtual Reality / Augmented Reality

Total Addressable Market

2025 Base Case VR/AR Estimates

VIDEOGAMES

\$11.6bn

- Estimated users: 216mn
- Markets disrupted: videogames

LIVE EVENTS

\$4.1bn

- Estimated users: 95mn
- Markets disrupted: live ticket sales

VIDEO ENTERTAINMENT

\$3.2bn

- Estimated users: 79mn
- Markets disrupted: online streaming

RETAIL

\$1.6bn

- Estimated users: 32mn
- Markets disrupted: e-commerce

REAL ESTATE

\$2.6bn

- Estimated users: 0.3mn
- Markets disrupted: commissions

EDUCATION

\$0.7bn

- Estimated users: 15mn
- Markets disrupted: K-12 and higher-ed software

HEALTHCARE

\$5.1bn

- Estimated users: 3.4mn
- Markets disrupted: patient monitoring

MILITARY

\$1.4bn

- Estimated users: 0.7mn
- Markets disrupted: defense training and simulation

ENGINEERING

\$4.7bn

- Estimated users: 3.2mn
- Markets disrupted: CAD/CAM software

SOFTWARE

\$35bn

- 60% of VR/AR software revenue will be driven by the consumer (vs. enterprise/public sector)
- Videogames will be the first consumer market to develop
- Beyond videogames, we see real estate, retail and healthcare among the first markets disrupted

HARDWARE

\$45bn

- 4 main devices used to experience VR/AR: HMDs, host systems, tracking systems and controllers
- Our forecast is specific to HMDs
- Our base case assumes 125mn annual shipments by 2025

As the launching of iPHONE by apple in 2007, we expect new markets to be created and existing markets to be disrupted by the launching of a more advanced Input Device

Exhibit 9: Smartphone adoption curve

The early adoption was slow at first but quickly accelerated due in part to the 2007 launch of the iPhone
